PROJECTS

- Jan 2024 **LUNG CANCER DETECTION USING DEEP LEARNING**
- Developed and deployed a convolutional neural network (CNN) using VGG16 for lung cancer detection.
 - Achieved an accuracy of 92% with the model.
 - Reduced false positives by 18% through the implementation of data augmentation techniques.
 - Deployed the model using Streamlit for real-time, web-based predictions.
 - Reduced prediction time by 30% through model optimization and efficient deployment techniques.
- July 2023 **GENERATIVE AI TEXT SUMMARIZATION**
- Developed a text summarization tool to condense lengthy documents by up to 70%, providing concise summaries.
 - Utilized a Large Language Model (LLM) for real-time processing, capable of handling documents with up to 50,000 words.
 - Implemented CI/CD pipelines for continuous integration and seamless deployment of model updates.
 - Increases data comprehension and retention by 60% by focusing on critical points.
 - Ensures consistent and up-to-date model performance with streamlined deployment processes.
- Nov 2022 **CUSTOMER CHURN PREDICTION USING MACHINE LEARNING**
- Built a machine learning model to predict customer churn for a telecom company.
 - Used logistic regression, decision trees, and random forests for prediction.
 - Achieved an accuracy of 85%, with an F1-score of 0.82 and AUC-ROC score of 0.88.
 - Reduced churn prediction time by 35% through feature selection and optimization techniques.
 - Visualized important features using SHAP values for model interpretability, leading to a 20% increase in actionable insights for the business.
-

EDUCATION

- 2021-2025 **GRAPHIC ERA HILL UNIVERSITY** Dehradun, Uttarakhand
Bachelor's in Technology ; Majors in Computers Science and Engineering
 - CGPA: 8.7
- 2019-2020 **ARMY PUBLIC SCHOOL** Almora, Uttarakhand
Intermediate
 - CGPA: 9.3
- 2017-2018 **ARMY PUBLIC SCHOOL** Almora, Uttarakhand
High School
 - CGPA: 9.2
-

SKILLS

- **Technical Skills** : Python, Pandas, NumPy, Scikit-learn, TensorFlow, PyTorch, NLP, NLTK, SpaCy, Hugging Face Transformers SQL, Database Management.
 - **Hard Skills** : Deep Learning, Machine Learning, Neural Networks, Supervised Learning, Unsupervised Learning, Hyperparameter Tuning, Model Evaluation, Feature Engineering, Natural Language Processing, Generative AI, Time Series Analysis, Cross-validation, Trend Analysis, Data-driven Solutions, Product Development, Quality Engineering, Agile Methodologies, Algorithms, Analytics, Data Processing, Data Science, Execution, ML, Product Management, Software Development, Tech Stack.
 - **Soft Skills** : Problem-solving, Critical thinking, Communication, Teamwork, Analysis, Assisting ,Collaborative work,Innovation, Brainstorming,
-

ACHIEVEMENTS

- Secured 1st place in a 24-hour Hackathon for innovative software solution development.
- Participated in national coding competitions and hackathons, showcasing strong problem-solving abilities.
- Led a team project that resulted in a 25% reduction in processing time for image classification tasks.
